## 7.2 – Best Practices

### 7.2.1 – Describe at least two institutional best practices

**Best Practice: 1**

1. Title of the Practice CITCAT (CIT Common Aptitude Test)
2. Goal To encourage students from economically weaker section with good academic background to pursue engineering education
3. The Context There are multiple instances wherein meritorious B.E aspirants are deprived of education due to their economic background. If such students are supported with free education, it can have great impact on quality technical manpower supply in the nation. In order to encourage and extend the helping hand to the student community who are all from economically weaker section with good academic back ground, CIT conducts Common Admission Test (CITCAT) for nearby districts students. Those who excel in this selection process, CIT offers scholarship for pursuing Free Engineering Education for one student in each discipline.
4. The Practice CIT offers Free Education through CITCAT since 2008. Standard Selection Procedure followed in CITCAT Level 1. Written Test (online) An online based test will be arranged based on the PU syllabus. Level 2. Group Discussion Based on the performance in test and their CET Ranking, few students are shortlisted and are called for Group discussion. Level 3. Personal Interview with candidates Based on the performance Group discussion candidates will be further shortlisted and will be called for personal interview with a panel consisting of Director and the CITCAT organizing committee. Level 4. House visit and interaction with parents and neighbors. Based on the performance and interaction in the interview process candidates are further shortlisted and team of senior faculties visit each shortlisted to know their social and economic status.

Level 5. Personal interview with The Director Principal for final selection.

Based on the house visit report submitted by the team, candidates will be called for final interview with The Director Principal for final seat allotment.

5. Evidence of Success

- Students with diverse economic and social background in the campus.
- Improvement in the quality of student intake
- Beneficiaries of CITCAT who have completed the course are now doing well professionally.
- Offering more number of rural technical manpower to labour market.
- Contribution to Institutional Social Responsibility
- Empowering the rural Girl students

6. Problems Encountered and Resources Required

Identifying the most genuine candidates for free engineering education is highly challenging task. CIT has very robust selection process for the same. CIT has adequate resources for conduction of CITCAT.

Best Practice: 2

1. Title of the Practice Faculty Development Programs
2. Goal
  - To promote a culture at Channabasaveshwara Institute of Technology that promotes faculty enrichment and through which accomplish academic research excellence.
  - To provide leadership and support for innovation in teaching
  - To sustain the growth of faculty across the career span and across disciplines
3. The Context We believe that faculty are learners and as such, will continue to strive to improve their work. We believe that faculty members develop over a lifespan of their careers and that each career span requires a different faculty development approach. Improving also means that their classrooms will become more inclusive and learnercentered.
4. The Practice Series of Faculty Development programmes are organized during every semester vacation.
5. Evidence of Success
  - ? Enhanced domain knowledge / expertise of faculty
  - ? Better contribution of faculty to teaching learning process
  - ? Increase in the teaching and research competencies of faculty
  - ? Increase in the faculty job satisfaction
  - ? Increase in the number of funded projects undertaken by faculty
6. Problems Encountered and Resources Required

Though FDPs are very critical to any institutes, organizing FDP poses certain challenges. Given below are few challenges encountered by us

- ? Decision of organizing FDPs within the campus or outside the campus
- ? Undertaking comprehensive training need analysis of faculty and accordingly arrange FDPs
- ? Simulating the real time situation during FDP
- ? Catering to highly diverse interests of faculty

To ensure FDPs are more effective resources like exclusive state of the art training halls in every department, video/audio material to supplement lecture, more participation of industry personnel, prototypes/models for hands on experience etc. are required.
