NAAC Criteria -2

2.5.1

2.5.1 Mechanism of internal assessment is transparent and robust in terms of frequency and mode

**Internal Assessment Cell
C I T, Gubbi**

2.5.1 Mechanism of internal assessment is transparent and robust in terms of frequency and mode

2.5.1 Continuous Internal Evaluation (CIE) system

Mechanism of Internal assessment is transparent and robust in terms of frequency and mode. The Internal Assessment cell conducts three internal assessment tests as per the calendar of Events of the Institution.

IA will be conducted according to the VTU norms and guidelines for different schemes. Continuous Internal Evaluation (CIE) and Semester End Exam (SEE) is assigned as 40:60 ratios. In a semester, three CIE Tests i.e. Test-1, Test-2 and Test-3 will be conducted for 50 marks. The CIE is to be evaluated for 40 marks, in which CIE reduces to 30 marks and the remaining 10 marks will be awarded based on assignments, Unit test, Q and A.

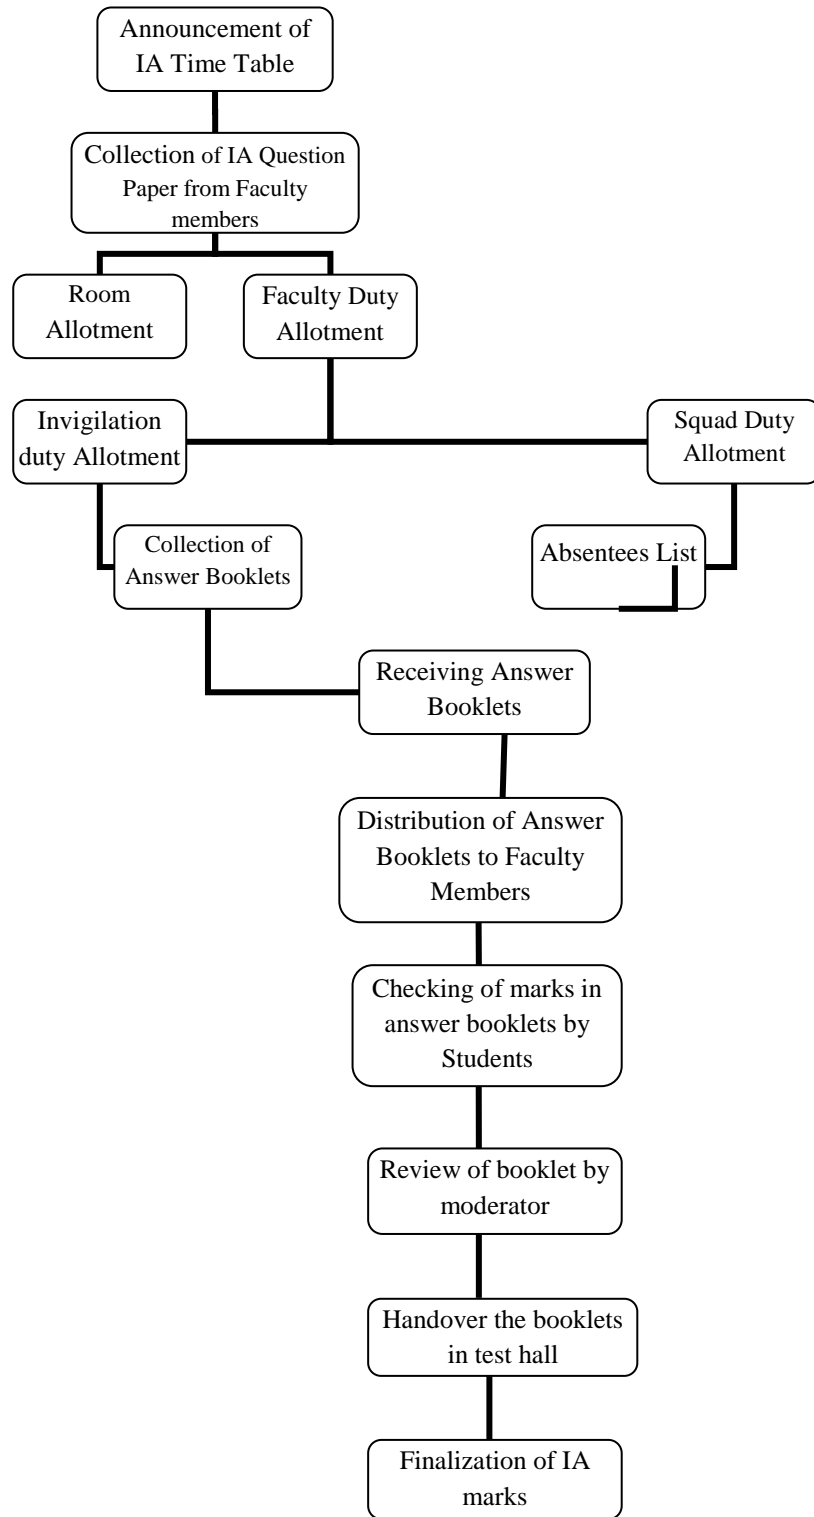

Internal Assessment Policies and Procedure

- As per the requirement of VTU it is necessary to conduct three internals and average marks have to be sent to university.
- The three internal assessment tests will be conducted in each semester at a gap of 6-8 weeks.
- The IA test dates will be decided in the HODs & Principal meeting while planning for Academic Calendar of Events.
-
- The test dates are brought to the notice of students through calendar of events and the detailed test time-table (Subject wise & Date wise) will be displayed to the students through college website, notice board well in advance.
- Internal Assessment tests will be conducted in centralised system and the flow is as follows:
 - Dean (IA) will call a meeting of Department test coordinators to discuss about total number of students enrolled, available class rooms and allotment of rooms, list of DCS and Invigilators available in each department. The tests will be conducted just like University exams
 - Department Test coordinator will send circular to faculty member to prepare the question paper in their respective subject and to submit it to the test committee within the scheduled date. Question paper pattern is well aligned with University question paper pattern.
 - Question papers are scrutinised by Moderators and the same is authenticated by Head of the department.
 - Question papers of all the subjects of all the branches will get printed by test committee confidentially.
 - Dean (IA) will allot the invigilation duties and DCS duties for all the faculty members.

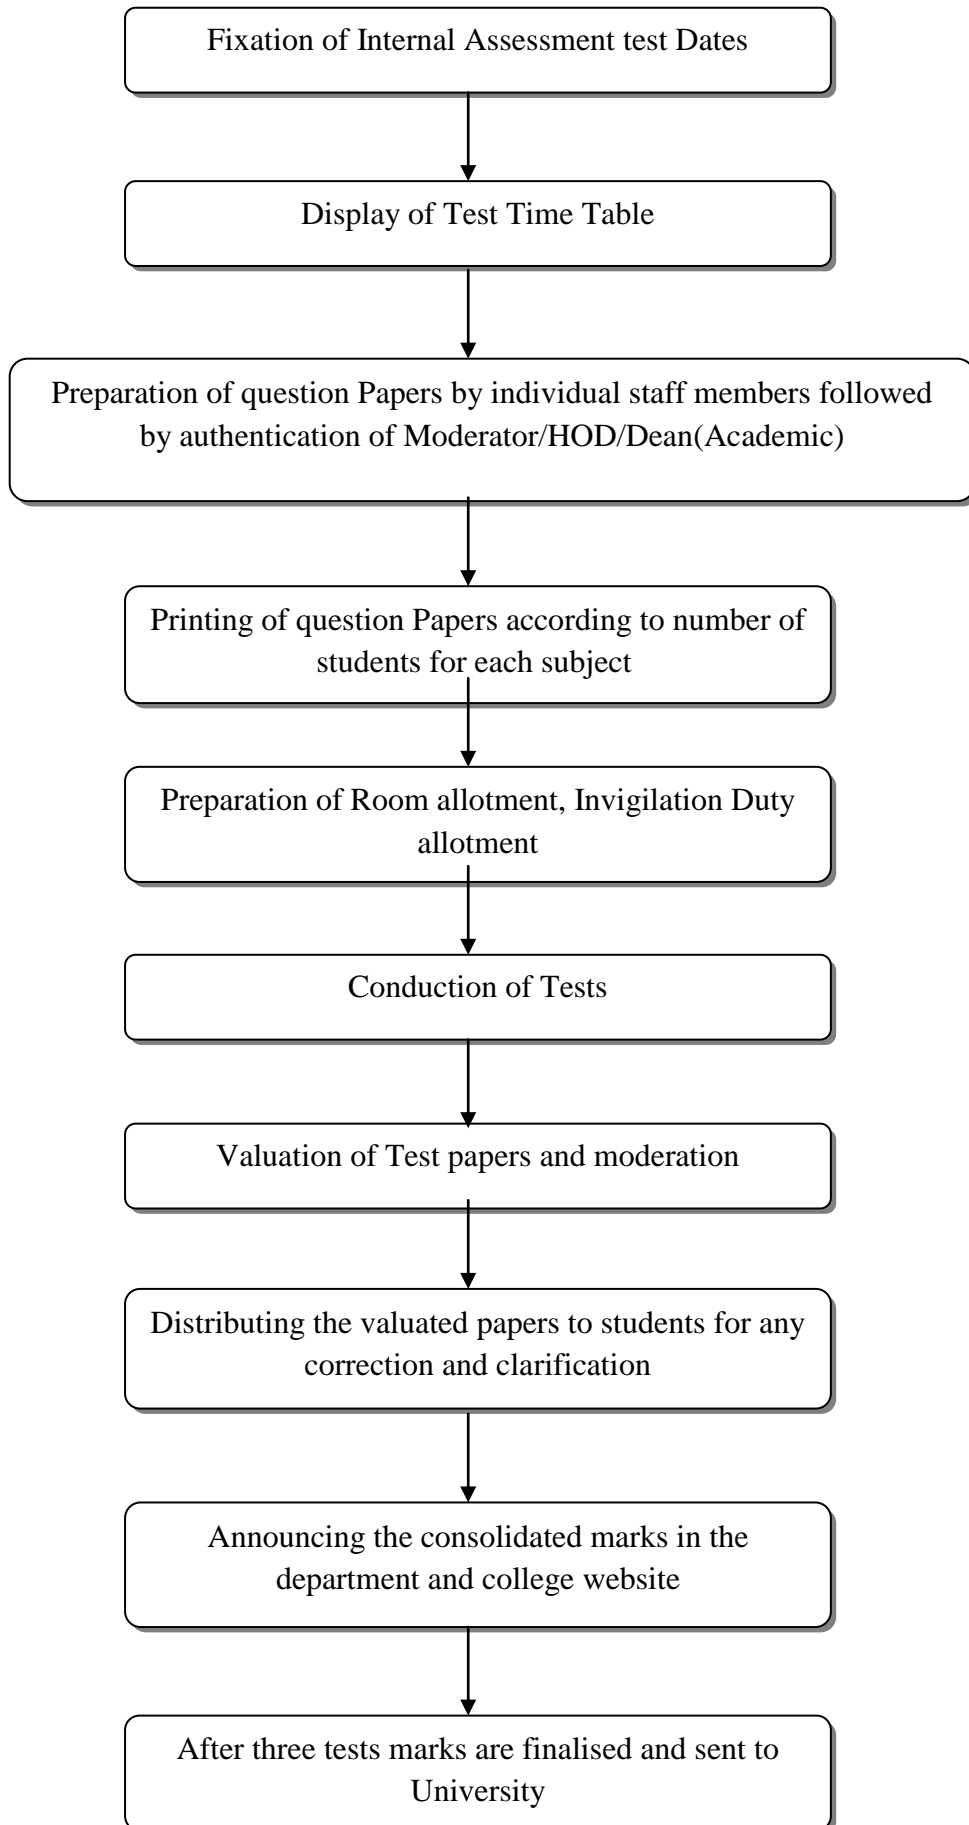

- Tests will be conducted on scheduled dates just like university examination. All the rules and regulations of university examination will be followed in the internal assessment test.
- The tests will be of one and half hour duration, the question paper contains 8 full questions out of which students have to answer 5 full questions.
- For CBCS scheme question paper consists of 10 full questions out of which students have to answer 5 full questions.
- Tests will be conducted for three days and in each day tests for two subjects are scheduled.
- After the internal assessment tests are conducted valuation process begins.
- We follow centralised valuation system. All the faculty members will do the valuation at valuation centre.
- The moderation of some sample answer books in each subject will be done by moderators
- After the completion of valuation, valued answer books will be issued to students to go through. Any discrepancies if they found in the answer books (like totalling mistake, the award of marks are not justified etc.) can be brought to the notice of the staff member and get it corrected.
- After this process is completed the IA marks obtained by students will be tabulated in the department office of respective branches and hard copy of the same is taken and gets approved by HOD and Principal for further process.
- These copies will be scanned and will be put in college website and also the IA marks will be sent to parents of the students.
- After the three tests the average marks of each subject of each semester will be taken and will be uploaded in the VTU web portal. Hard copy of the consolidated IA marks of all the students of all the semester will be sent to university.

ONLINE TEST PROCESS: 2020-2021

During the pandemic, Internal Assessment Test was conducted through online platform in Goggle Classroom for academic year 2020-2021 (Odd and Even Semester). During the pandemic special care was taken to keep the Test process robust.

1. Test Schedule announcement to students through circular
2. Scrutiny of IA-Question Paper as previously followed.
3. Student Group created separately for each subject semester wise.
4. According to IA time table question papers is uploaded in Google class room.
5. Students need to write answer to the questions in plain sheets mentioning their Name, USN, Signature in every sheet uploaded the Test script.
6. After completion of IA schedule, students has to scan the answered sheet and have to upload in Google Class room link.
7. Faculty will evaluate the answered sheet and upload the marks in Google class room, so that students will get evaluated marks for respective subjects.

GUIDELINES FOR STUDENTS TO ATTEND ONLINE IA

1. The Online test is scheduled as per schedule in IA time table.
2. The students should login to the scheduled session before 15 minutes to the commencement of the test and adhere to the instructions.
3. After the write up, the next 15 minutes, the students have to scan the answer sheet and upload the same in the specified link.
4. The format to name the scanned document is follows: USN_Name_Subjectcode.
5. This process has to be completed within 15 minutes for morning and afternoon session.

INTERNAL ASSESSMENT QUESTION PAPER

II INTERNALS

QMP 7.5 R/C-I Rev.1

Department: Civil Engineering

Title: Building Materials and Construction

Sem: III

Date: 26-10-19

Course Code: 18CV34

Sections: A

Max. Marks: 50

Time: 1½ Hours

Note: I. Answer any FIVE full questions choosing one full question from each.

Questions	CO's	RBT	Marks
a. Briefly explain the classification of stone masonry.	2		10
OR			
b. With neat sketch explain various Joints provided in stone masonry.	2		10
a. Write the functions of lintel. List and Explain any three type of lintel.	3		10
OR			
b. With neat sketch explain various components of Segmental Arch.	3		10
a. Explain King and Queen post Truss with neat sketch.	3		10
OR			
b. Write the requirements of good floor and factors affecting the selection of flooring material.	3		10
a. List the types of roofs and explain any two in detail.	3		10
OR			
b. What are the factors considered while locating doors and windows. State briefly the requirement of good stairs.	3		10
a. Explain with neat sketch 1. Panel door 2. Corner window 3. Louvered window 4. Flush door	3		10
OR			
b. Plan a dog legged stair for a building in which the vertical distance between the floors is 3.6 m. The stair hall measures 2.5 m x 5m	3		10

I-INTERNAL ASSESSMENT QUESTION PAPER

Department: CV
 Duration: 1 1/2 Hr

Sem: VIII

Date: 25/03/2019

Sub: Design of Pre Stressed Concrete Elements (15CV82) Max. Marks: 40 M

Note: Answer 5 full questions choosing one from each part.

Questions	Bloom's taxonomy	Marks
Explain with the neat sketches pre tensioning and post tensioning methods, with advantage of these methods.	Remembering	8
OR		
Explain the concept of Internal Resisting Couple method.	Understanding	8
Explain the concept of using high strength concrete and high strength steel in PSC structures.	Remembering	8
OR		
Explain the concept, 'The locus of the points of application of resultant force' in PSC members	Understanding	8
5 A prestress concrete rectangle beam has 300 mm wide and 600 mm deep spanning over 10 m, with parabolic cable eccentricity of 150 mm at midspan and concentric at ends. The prestress force in the cable is 250 kN. Beam supports a LL of 3 kN/m. Calculate resultant stress in concrete at midspan under working load and sketch the stress distribution.	Analyze	10
OR		
6 A prestress concrete beam of section 120mm x 300 mm used over a span of 6m support UDL of 4kN/m (including self weight). The beam is prestressed by a straight cable carrying a force of 180 kN and located at an eccentricity of 50mm. determine the location of the thrust line in the beam and plot its position at quarter and central span.	Evaluating	10
7 Rectangular prestressed concrete beam 150mm x 300 mm over a span of 10m. The cable with the zero eccentricity at the support and linearly varying off 50mm at centre carries an effective prestressing force of 500 kN. Find the magnitude of the concentrated load Q located at the centre of the span for the following at midspan of the section (i) If the load counteracts the bending effective of the processing force (neglecting self weight of the beam) (ii) If the pressure line passes through upper kern point of the section under the action of external load, self weight and prestress.	Analyze	14
OR		
8 A rectangular beam of C/S 30 cm deep and 20cm wide is prestressed by means of 15 wires of 5mm diameter located at 6.5cm from bottom of the beam and 3 wires of diameter 5mm at 2.5cm from top is prestressed by 840 N/mm ² . Calculate stress at the bottom fiber of midspan section, when beam supports its own weight over a span of 6m, having a UDL of 6kN/m. find the maximum working stress in concrete. Take density of concrete 24kN/m ³	Evaluating	14

24-03-2017

Minutes of the meeting:

A meeting has been conducted in Test Hall and following points have been discussed

1. It has been informed to the coordinators to check the list of students appearing for Internals including regular, lateral entry to III semesters and eligible from previous years.
2. Informed to coordinators to bring the students' strength of each semester, section for allocation of the rooms.
3. After the discussion with coordinators the following room allotment has been done:
Basic Science: CRC 101, 102, CRC 007, MC101, 102, 201,
CSE: CRC201, 202, 203, 204, 205, 206, 207, 208
ISE: LH301, 302 & 303
ECE: CRC301/302, 303, 304, 305, 306, 307, 310 & CRC210
EEE: CRC 308, 309, CRC209, Machines Lab
ME: CRC 103, 104, MC
CE: MC301, 302, 303, DH1 & DH2
Further the coordinators are informed to make the room allotment and display the same on the tests dates in the concerned department notice boards.
4. The coordinators informed to give the list of faculty members of their department so that invigilation duty allotment can be done at the earliest.
5. It has been discussed to take the strict vigilance during internals to avoid malpractice cases. In this regard all coordinators are agreed to allot DCS (Deputy Chief Superintend) duty to some senior faculty members. The duties of DCS are to take a round of the rooms allotted to them and be vigilant. They can also check any student in the room randomly.
6. It has been discussed to allot 3 students in a desk preferably from 3 different semesters for 3rd to 5th semesters and for I year students

It is agreed to allot 1 chemistry cycle student in between 2 physics cycle students.

7. Coordinators have been asked to give proper instructions to invigilators from their respective department regarding code and conduct of their responsibilities.
8. After discussion all the coordinators have agreed for centralised invigilation duty allotment to be done by Dean (Internal Exams).
